Optional 990 or 905 companion model

5YRS ESSE 5 Year Product Guarantee excluding consumables, subject to terms and conditions. Visit esse.com for more information.

Our small and perfectly formed 500 EL is the cooker you've been waiting for: a wonderfully versatile mini range cooker that can be incorporated within a fitted kitchen or stand alone in even the smallest galley or compact city kitchen-diner.

The 500 EL slots easily into the space reserved for a standard cooker, providing the beauty of a cast-iron stove with the amazing roasting and baking qualities of an ESSE range.

Comprising separate top and bottom ovens, a full-width grill and a generous cast iron hotplate accommodating up to three pans, the 500 EL delivers the plug in and cook flexibility of a modern cooker with all the style and elegance of an ESSE.

The dials for ovens, grill and hob are neatly housed in a standalone external control panel with a cable length of 1.5 metres, which can be wall-mounted or freestanding, maximising the space available on the hob. And, of course, with no flue needed, your 500 EL can be positioned wherever there's a 13AMP power supply.

Both the generous ovens – designed to be deep rather than wide to retain heat – can be used independently and incorporate ESSE's patented surround heat engineering for even baking results every time. The grill and hotplate are also independently controlled.

Suitable for use with all pans, the powerful heat of the hotplate is perfect for direct to cast iron cooking and the bolster lid creates a 'steam and sizzle' cooking environment. In standby/slumber mode, the entire hob warms up – ideal for keeping dishes warm.

Available in a choice of 20 colours, the 500 EL benefits from an ESSE 5yr guarantee from warranty registration when purchased through an ESSE specialist retailer.

ESSE stoves and range cookers: handbuilt in Britain since 1854.

1. The 500 EL's 33cm diameter cast iron hotplate can accommodate up to three pans and is great for cooking food directly on the hotplate

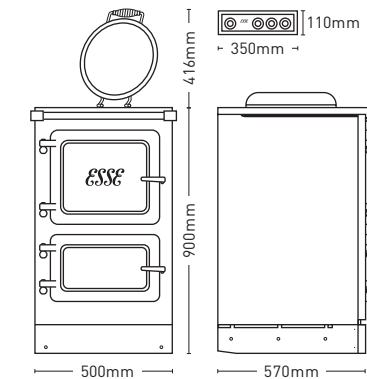

2. Supplied with a slimline external control panel (350 wide x 110 high x 65 deep), that can be wall mounted or available with feet to stand on a worktop.

3. Independently controllable cooking: both of the generous ovens can be used independently. The hot plate and grill are also independently controlled.

4. The 500 EL incorporates an oven moisture control vent for both the top and lower oven. Retain moisture for baking or release for crisping roast potatoes.

Every 500 EL is supplied with large roasting dish, ESSE apron, glove set, a comprehensive user guide and a welcome pack to join the ESSE Owners Club.

500 EL measurements and technical specifications

MODEL INFORMATION

Weight	200kg
Electricity supply	1 x 13AMP 220-240V (Power surge protected)

OVEN CAPACITY

Top oven	42ltr
Bottom Oven	30ltr

OPTIONAL EXTRACTION HOOD

Capacity 1000 cubic metres per hour
4 speed extraction fan
