WHEN SPACE IS AT
A PREMIUM

ESSE Plus 1 50cm wood fired cook stove

...OR THE
**PERFECT
PARTNER**
FOR
**YOUR ESSE
RANGE COOKER**

This mini wood-burning range cooker has two aspects to its personality. It's ideal as a stand-alone unit in locations with limited space, and equally perfect as a partner to your ESSE electric or gas fired range – providing you with an extra oven, and a large “target” hotplate.

Think you don't have space for a cast iron range cooker? Think again: the Plus 1 offers you all the pleasures of woodfired cooking, on a smaller scale – with one deep oven, and a large variable heat zone hob. Inside the cast iron oven door, there's an inner glass door – allowing you to keep a close eye on your view, and to enjoy the flickering flames.

It really is a highly versatile and beautifully engineered stand-alone cooker – though, of course, it would also make the perfect companion for a larger ESSE range cooker, such as the EL 13Amp. Not only would that give you gargantuan cooking capacity; you'd also have the choice of modern electric touch-of-a-button convenience, or the earthier pleasures of cooking over a fire you have lit and tended.

Did we mention that they love our wood-burning cookers for cooking and heating at River Cottage HQ? This one just fits perfectly in their reception lodge.
